

Dr. David Krause has 18 years of experience in environmental science and public health, with particular emphasis in the areas of toxicology, occupational health, industrial hygiene, indoor air quality, and Legionnaires' Disease. His work at ENVIRON includes design and direction of projects to diagnose and resolve problems resulting from environmental exposure to chemicals in the workplace or ambient environment. Prior to joining ENVIRON, David served as the state toxicologist for the Florida Department of Health, where he co-authored Guidelines for the Surveillance, Investigation, and Control of Legionnaires Disease in Florida. He is a Certified Industrial Hygienist with expertise in public health impacts of combustion products, flame retardants, irritant chemicals, indoor air quality, Legionnaires disease and mold.
