

Shantini Gamage received a PhD from the Department of Molecular Genetics, Biochemistry and Microbiology at the University of Cincinnati College of Medicine and a MPH from The Ohio State University. Prior to joining the Veterans Health Administration (VHA) of the Department of Veterans Affairs in 2006, Dr. Gamage conducted research in the fields of cancer biology, microbiology and bio-preparedness, and epidemiologic investigations of foodborne outbreaks.

For the past 5 years, Dr. Gamage has been an epidemiologist in the VHA National Infectious Diseases Program Office. One of her main focuses is translating science into infectious diseases policy and guidance for VA healthcare facilities nationwide. Her range of subject matter expertise is diverse, including responsibility for development of VHA guidance on bed bugs.
