**Program Title:** ICD-10: What You Need to Know Now: It’s Not Just About the Codes  
**Program Sponsor:** National Hospice and Palliative Care Organization  
**Program Date:** April 26, 2011

**Webinar Description:**

Are you ready for the HIPAA version 5010 transition and the ICD-10 changeover? All healthcare providers need to have version HIPAA 5010 implemented by January 1, 2012 or their claims will not be paid. Version HIPAA 5010 must be implemented to support the transition from ICD-9 diagnostic coding to ICD-10 which will occur on 10/13/13. Hospices will need to have electronic transaction software that can handle the upgrade. Shortly thereafter, all providers who accept Medicare or private insurance would need to learn a new set of diagnostic codes that is often much more complex than the current system.

**Webinar Objectives:** At the completion of this program, participants will be able to:

- Describe what implementation of ICD-10 will mean to their organization;
- Identify at least 3 steps that must be taken for successful transition to V.5010 and how to begin preparing for this transition;
- Discuss the basic differences between ICD-9 and ICD-10.
